personal digital experience

https://simatupangkevin.web.app | simatupangkevin.web.app

SUMMARY

membangun sebuah website personal yang tidak terasa seperti portfolio developer konvensional, tetapi menjadi digital experience yang menunjukkan: siapa saya, bagaimana saya berpikir, apa yang saya bangun, bagaimana saya bekerja, apa yang saya pelajari, apa yang sedang saya eksplorasi, bagaimana kualitas dan karakter pekerjaan saya. website harus menggabungkan professional presentation dengan immersive, cinematic, editorial, dan creative interaction. website bukan sekadar tempat menampilkan CV. CV hanya menjadi salah satu bagian dari keseluruhan experience.

TECHNICAL SKILLS

Next.js
React
TypeScript
modern CSS / Tailwind
Firebase
Firestore
Firebase Storage
Firebase Hosting
component-based UI
content-driven architecture

PRODUCT OVERVIEW

Product name: personal digital experience Official website: https://simatupangkevin.web.app Product type: interactive personal portfolio and professional identity platform Primary objective: membangun sebuah website personal yang tidak terasa seperti portfolio developer konvensional, tetapi menjadi digital experience.

PLATFORM AND INFRASTRUCTURE

Primary platform: Firebase Primary hosting: Firebase Hosting Primary domain: simatupangkevin.web.app Backend ecosystem: Firebase Hosting, Firestore, Firebase Storage, Firebase Authentication (bila diperlukan), Firebase Analytics (bila diperlukan).

PRODUCT PHILOSOPHY

experience first; content driven; scalable; premium; creative; professional; mobile first.

TARGET AUDIENCE

Primary audience: recruiters, hiring managers, potential clients, collaborators, developers, designers, people interested in the creator's work. Secondary audience: friends, community, other creators, technical audience.

CORE USER GOALS

Memahami siapa pemilik website dalam beberapa detik; melihat project terbaik; memahami kontribusi dan proses; melihat teknologi dan kemampuan; mengetahui pengalaman dan background; melihat CV; menemukan contact channels; menjelajahi eksperimen; membuka detail project tanpa merasa berpindah website.

CONTENT ARCHITECTURE

Entity utama: projects, experiments, experiences, skills, technologies, education, social links, site settings, resume, media assets. Project harus memiliki data sendiri dan frontend menghasilkan interface dari data.

DYNAMIC PROJECT SYSTEM

Satu generic project renderer dengan route /projects/[slug]. Project baru hanya perlu ditambahkan ke content source tanpa new route/page/component/layout/manual navigation code.

FIREBASE CONTENT MODEL

Firestore collections: projects, experiments, experiences, skills, technologies, education, socialLinks, siteSettings. Media besar di Firebase Storage (projects/, experiments/, profile/, resume/).

HOMEPAGE REQUIREMENTS

Hero, selected projects (featured=true), capabilities, experiments, experience, resume (view & download), contact.

PERFORMANCE AND ACCESSIBILITY

Fast initial load, responsive images, lazy loading, progressive enhancement, minimized javascript, no layout shift, optimal Firebase reads, caching. Accessibility: semantic HTML, keyboard navigation, focus states, readable contrast, accessible labels, reduced motion support, meaningful alt text, proper heading hierarchy.

SEO AND ANALYTICS

Per-project metadata: title, description, open graph image, canonical URL; project detail indexable. Analytics events considered: project opened, project link clicked, resume viewed, resume downloaded, contact clicked, external link clicked.

DEPLOYMENT

Production on Firebase Hosting with domain simatupangkevin.web.app. Workflow: local development -> build -> verification -> firebase deployment -> production. Environment variables and Firebase configuration separated per environment.

NON FUNCTIONAL REQUIREMENTS

maintainable, scalable, reusable, accessible, performant, SEO friendly, mobile first, visually consistent, resilient terhadap content changes, efficient dalam penggunaan Firebase, mudah dikembangkan lintas fitur.

ANTI REQUIREMENTS

Tidak boleh terasa seperti template portfolio generik, terlalu banyak section tanpa tujuan, animation dekoratif berlebihan, glassmorphism berlebihan, CV sebagai main attraction, hardcode content di banyak component, berlebihan Firebase reads, media besar di Firestore, mengorbankan performance demi visual.

SUCCESS CRITERIA

professional, memorable, immersive, scalable, content manageable, maintainable, practical, reliable.

FUTURE EXTENSIBILITY

writing/journal, blog, changelog, project statistics, interactive demos, guestbook, now page, digital garden, awards, certifications, downloadable assets, multilingual content, admin dashboard, search, project filtering, project categories, timeline, easter eggs.

CORE PRODUCT PRINCIPLE

content changes must not require presentation code changes.
